Maintainer Corporation of Iowa, Inc. is pleased to announce its new DuaLock line of all-aluminum drawer cabinets. Increased payloads and longer service life can now be realized through the new heavy duty all-aluminum design. The following features represent the cornerstone of Maintainer's new DuaLock line and their devotion to innovative, dependable and quality products.

- **Corrosion Resistance**  
The all-aluminum 3003-H14 construction fights corrosion in the toughest of environments. Aluminum does not "rust away" on exposure to the environment like steel; its natural oxide coating blocks further oxidation.
- **Increase Payload**  
Every pound of material saved in the construction of the drawer cabinets equals one pound of extra payload capacity, representing up to 40% extra payload capacity over steel. The same class of truck can offer more capability than ever before!
- **Increased Functionality**  
The exclusive DuaLock feature securely locks the drawer assembly in both the open and closed positions. No more unwanted drawer closures when positioned on uneven ground..
- **Increased Capacity**  
Rated at 500 pounds static and 300 pounds mobile, these drawer cabinets have been designed to maximize your storage options.

Maintainer has been building premium quality standard and customized service bodies, lube bodies, cranes, and accessories since 1976. For more information on other fine Maintainer products, call 1-800-831-8588 for the dealer nearest you or visit our website at [www.maintainer.com](http://www.maintainer.com).
