

REMOVABLE COMPARTMENTS

PATENT #10,676,043

MAXIMIZE TRUCK USAGE

With Our Innovative Design

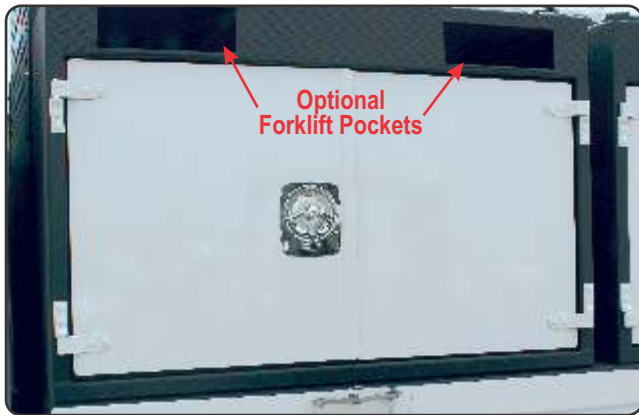

WHY REMOVABLE?

- Multiple mechanics can use the same truck. It works great for 24/7 operations or when operators work several days on/several days off. In 5 minutes you can swap one mechanic's tools for the other!
- Save chassis costs - save up to \$125,000 per vehicle in your fleet!

- ✓ **CAN BE LIFTED WHILE FULLY LOADED WITH TOOLS & SUPPLIES**
- ✓ **COMPARTMENTS CAN BE CONFIGURED TO YOUR SPECIFICATIONS**

DURABLE:

Built to withstand frequent hoisting, relocation and use! The top shell is 11 ga. rolled diamond steel, the floor and sides are 12 ga. steel - all galvanealed. The outside of the cabinets are lined with a protective spray for extra-long life and protection from the elements.

CUSTOMIZE YOUR LAYOUT:

Above-deck or full side-compartment removal available. Can be crane-side or opposite, up to 2 compartments per truck. Optional PSS system and forklift pockets available.

VERSATILE:

These compartments are versatile enough to set on the ground and use. The built-in casters (700 lbs. capacity each) make it easy to maneuver around the shop when not installed on the truck.

CENTERING GUIDES:

12-gauge stainless steel compartment centering guides make switching cabinets easy and stress-free so you can get back to work!

SAFETY:

Compartments are secured with a lock bar and can be wired for power. A warning indicator light in the cab will alert you if the compartment is not locked down securely.

USER FRIENDLY:

Compartments are designed with four convenient lifting points for removal and placement with a crane.
