The Maintainer Advantage

MAINTAINER CRANES

Maintainer Cranes are built with strength, durability and safety in mind:

- hexagonal boom design
- short and tall tower design
- Twelve crane models are in the product line, including our newest H10034 model with an industry-leading 34' reach!

MAINTAINER ACCESSORIES

LUBE BODY PACKAGES: Consist of robust, heavy-duty parts to handle an extreme environment. Various flow rates are available to meet your needs. Internal compartments protect against contamination and are insulated and heated for top consistent performance in colder climates.

ALL-IN-ONE POWER SYSTEMS: VanAir and EnPak units provide power for air compressor, generator, welder, and hydraulic pump - all functional with the vehicle engine off!

SIGNATURE SERIES

In addition to custom configurations, our Standard **Signature Series Line** highlights Service, Lube, and Combination configurations.

MANY OF THESE ARE IN STOCK & AVAILABLE NOW!

Check out www.maintainer.com for availability or to start configuring the custom body of your dreams!

MAINTAINER BODIES

We Build Them To Last!

- 12 gauge A60 galvanized steel construction body shell - tops and backs.
- 3/16" thick aluminum doors with aluminum "C" channel door reinforcement
